37 CFR Part 1

RIN 0651-AB04

[Docket No. 000308064-1028-02]

Rules to Implement Optional Inter Partes Reexamination Proceedings: Delay of Effective Date

AGENCY: United States Patent and Trademark Office, Commerce.

ACTION: Final rule; delay of effective date.

SUMMARY: In accordance with the memorandum of January 20, 2001, from the Assistant to the President and Chief of Staff, entitled "Regulatory Review Plan," published in the Federal Register on January 24, 2001, this action temporarily delays for 60 days the effective date of the rule entitled Rules to Implement Optional Inter Partes Reexamination Proceedings, published in the Federal Register on December 7, 2000, at 65 FR 76756. That final rule implements the optional inter partes reexamination provisions of the American Inventors Protection Act of 1999.

DATES: The effective date of the Rules to Implement Optional Inter Partes Reexamination Proceedings, published in the Federal Register on December 7, 2000, at 65 FR 76756, is delayed for 60 days, from February 5, 2001 to a new effective date of April 6, 2001.

FOR FURTHER INFORMATION CONTACT: Kenneth M. Schor or Gerald A. Dost, Senior Legal Advisors. Kenneth M. Schor and Gerald A. Dost may be contacted by telephone at (703) 305-1616.

SUPPLEMENTARY INFORMATION: The effective date of the final rule to implement the optional inter partes reexamination provisions of the American Inventors Protection Act of 1999, entitled Rules to Implement Optional Inter Partes Reexamination Proceedings, and published in the Federal Register on December 7, 2000, at 65 FR 76756, is temporarily delayed from February 5, 2001 until April 6, 2001. To the extent that 5 U.S.C. section 553 applies to this action, it is exempt from notice and comment because it constitutes a rule of procedure under 5 U.S.C. section 553(b)(A). Alternatively, the agency's implementation of this rule without opportunity for public comment, effective immediately upon publication in the Federal Register, is based on the good cause exceptions in 5 U.S.C. section 553(b)(B) and 553(d)(3), in that seeking public comment is impracticable, unnecessary and contrary to the public interest. The temporary 60-day delay in effective date is necessary to give Department officials the opportunity for further review and consideration of new regulations, consistent with the Assistant to the President's memorandum of January 20, 2001. Given the imminence of the effective date, seeking prior public comment on this temporary delay would have been impractical, as well as contrary to the public interest in the orderly promulgation and implementation of regulations.

Grant of Certificate of Interim Extension of the term of U.S. Patent No. 4,229,449: roboxetine mesylate

AGENCY: United States Patent and Trademark Office, Commerce.

ACTION: Notice of Interim Patent Term Extension

SUMMARY: The United States Patent and Trademark Office has issued a certificate under 35 U.S.C. 156(d)(5) for a third one-year interim extension of the term of U.S. Patent No. 4,229,449.

FOR FURTHER INFORMATION CONTACT: Karin Tyson by telephone at (703) 306- 3159; by mail marked to her attention and addressed to the Assistant Commissioner for Patents, Box Patent Ext., Washington, D.C. 20231; by fax marked to her attention at (703) 872-9411, or by e-mail to karin.tyson@uspto.gov.

SUPPLEMENTARY INFORMATION: Section 156 of Title 35, United States Code, generally provides that the term of a patent may be extended for a period of up to 5 years if the patent claims a product, or a method of making or using a product, that has been subject to certain defined regulatory review, and that the patent may be extended for interim periods of up to a year if the regulatory review is anticipated to extend beyond the expiration date of the patent.

On November 17, 2000, patent owner Pharmacia & Upjohn, S.p.A., filed an application under 35 U.S.C. § 156(d)(5) for a third interim extension of the term of U.S. Patent No. 4,229,449. The patent claims the active ingredient roboxetine mesylate (Vestra™). The application indicates a New Drug Application for the human drug product roboxetine mesylate (Vestra™) has been filed and is currently undergoing regulatory review before the Food and Drug Administration for permission to market or use the product commercially. The original term of the patent expired on January 8, 1999, and has been previously extended under 35 U.S.C. § 156(d)(5) to January 9, 2001.

Review of the application indicates that except for permission to market or use the product commercially, the subject patent would be eligible for an extension of the patent term under 35 U.S.C. § 156. Since it is apparent that the regulatory review period will extend beyond the extended expiration date of the patent, the term of the patent is extended under 35 U.S.C. § 156(d)(5) for a term of one year from January 9, 2001.

Inapplicability of 35 U.S.C. § 102(d) to Plant Breeder's Rights Certificates

The USPTO recently took the position that a rejection under 35 U.S.C. § 102(d) would be appropriate based on a Plant Breeder's Rights (PBR) certificate granted prior to the date of the application for plant patent in the United States where the application for PBR was filed more than twelve months before the filing of the application in the U.S.

After review of the legislative history of 35 U.S.C. § 119(f) as amended by the American Inventor's Protection Act of 1999 (AIPA) (Title IV of the Intellectual Property and Communications Omnibus Reform Act of 1999 (S. 1948) as introduced in the 106th Congress on November 17, 1999), the USPTO has determined that a rejection under 35 U.S.C. § 102(d) based on a PBR certificate is not appropriate. While section 4802 of the AIPA added plant breeder's rights as a basis for a foreign priority claim under 35 U.S.C. § 119(f), there was no corresponding change to 35 U.S.C. § 102(d). The legislative history accompanying the AIPA makes it clear that "Section 4802 also adds subsection (f) to section 119 of the Patent Act to provide for the right of priority in the United States on the basis of an application for a plant breeder's right first filed in a WTO member country or in a UPOV Contracting Party . . . Because section 119 presently addresses only patents and inventors' certificates, applicants from these countries are technically unable to base a priority claim on a foreign application for a plant breeder's right when seeking plant patent or utility patent protection for a plant variety in this country." (*Congressional Record*, S. 14723 (Nov. 17, 1999)). This legislative history supports the position that absent a clear statutory basis, rejections under 35 U.S.C. § 102(d) based on PBR certificates are not appropriate. Moreover, unlike the changes made in Public Law 92-358 (July 28, 1972) which added inventor's certificates to both 35 U.S.C. § 119(d) and 35 U.S.C. § 102(d), the AIPA did not include a corresponding change to 35 U.S.C. § 102(d). Therefore, to maintain consistency in statutory interpretation the USPTO will not make rejections under 35 U.S.C. § 102(d) based on a PBR certificate. Any such rejections that have been made under 35 U.S.C. § 102(d) will be withdrawn.

After consulting with interested circles in industry and the bar, the USPTO may consider seeking legislation that would further clarify the status of certificates of plant variety protection as prior art.

SPECIAL BOXES FOR PATENT MAIL

Special box designations should be used to allow forwarding of particular types of mail to the appropriate areas as quickly as possible. Such mail is forwarded to the appropriate area without being opened. Only the specified type of document should be placed in an envelope addressed to one of these special boxes. If any documents other than the specified type identified for each special box are addressed to that box, they will be significantly delayed in reaching the appropriate area for which they are intended.

Some correspondence may only be submitted via the Office's electronic filing system (EFS). For example, the following publication requests must be submitted via EFS:

a request for publication of an application as amended during examination (37 CFR 1.215(c));
a request for redacted publication (37 CFR 1.217(b));
a request for voluntary publication of an application filed before November 29, 2000 (37 CFR 1.221(a)); or
a request for republication of an application that has already been published (37 CFR 1.221(a)).

Instructions on how to file such a publication request via EFS are located on the Office's Electronic Business Center on the Office's Internet Web site http://www.uspto.gov <http://www.uspto.gov>) under the Electronic Business Center section.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information for the U.S. Patent and Trademark Office. Many PTDLs have on file patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs receive both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office* and numerical sets of patents in a variety of formats. Patent and trademark search systems in the Cassis CD-ROM series are available at all PTDLs to increase access to that information. It is through the CD-ROM systems and other depository materials that preliminary patent and trademark searches may be conducted through the numerically arranged collections.

Each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as sell as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials.

All information is available for use by the public free of charge. However, there may be charges associated with the use of on-line systems, photocopying and related services.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

Partnership PTDLs provide enhanced and expanded services for which fees are charged. They offer on-line patent text and image searching, on-line trademark searching, and videoconferencing for examiner interviews and workshops. They accept disclosure documents on site, order file wrappers, assignment documents and certified copies for their customers, and host a variety of seminars aimed at specific audiences, including practitioners, paralegals, and independent inventors. Currently, partnerships are located at the Great Lakes Patent and Trademark Center (GLPTC) at the Detroit Public Library in Detroit, Michigan and the Sunnyvale Center for Innovation, Invention and Ideas (SCI^3) at the Sunnyvale Public Library in Sunnyvale, California and at the South Central Intellectual Property Partnership at Rice (SCIPPR) at the Fondren Library of Rice University in Houston, Texas.

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
